KromoZone Whitepaper v3.1

The Ultimate Social Mining Experience on TON Blockchain

July 2025

Abstract

KromoZone revolutionizes Play-to-Earn on **The Open Network (TON)** with its **"Mine or Be Mined"** ecosystem. Accessible via **direct mining links** (no Telegram dependency), the platform combines competitive mining battles, zero transaction fees, and a deflationary triple-token economy. With **100% liquid tokens at launch** and seamless TON integration, KromoZone delivers the fairest and most engaging mining experience in crypto.

1. Introduction

1.1 The Problem with Traditional Airdrops

- **Low Retention**: 90%+ users abandon projects post-airdrop.
- **Bot Infestation**: Sybil attacks dilute rewards for real users.
- **No Utility**: Tokens become worthless after initial hype.

1.2 Why KromoZone?

☑ **Battle Mining**: Steal $KRC from others in real-time PvP duels.

☑ **TON-Powered**: 50K TPS, $0.001 fees, native TON wallet integration.

☑ **Deflationary Economy**: Burns + staking ensure long-term value.

☑ **No Vesting**: 100% liquidity at launch.

2. Core Architecture

2.1 Technical Stack

Component	Technology
Blockchain	TON Mainnet
Smart Contracts	FunC (TON-native)
Frontend	Web Mining Portal (`app.kromozone.com/mining`)
Oracle	TON Oracle (Testnet)

2.2 Key Features

A) Mining Battles

- **1v1 Duels**: Winner steals 10% of loser's unclaimed $KRC.
- **Clan Wars**: 5v5 team battles with shared rewards.

B) Triple-Token Economy

1. **$KRC (Utility)**: Mining, battles, governance.
2. **$KROMO (Governance)**: Earned via staking → Voting power.
3. **Battle Pass (NFT)**: Unlock premium rewards.

3. Tokenomics

3.1 Allocation (1B $KRC Total Supply)

Category	Allocation	Notes
Airdrop	35% (350M)	No vesting
Staking Rewards	20% (200M)	36-month emission

Ecosystem Fund	20% (200M)	DAO-controlled
Angel Investors	10% (100M)	Seed round (liquid)
Team	10% (100M)	Anonymous, no vesting
Pre-Launch Burn	5% (50M)	Deflationary boost

3.2 Deflationary Mechanics

- **5% burn** on lost duels.
- **2% burn** on DEX trades.

4. Roadmap (Q3 2025 – Q1 2026)

Phase 1: Pre-Launch (July 2025)

- **July 1–14**: Finalize FunC smart contract audits (TON Foundation).
- **July 15–28**: Beta testing (10K whitelisted users via mining link).
- **July 29**: Liquidity seeding on TonSwap.

Phase 2: Public Launch (August 2025)

- **August 1**: Mining portal live (`app.kromozone.com/mining`).
- **August 15**: First "Kromo Cup" tournament (5M $KRC prize pool).
- **August 30**: Staking V1 launch (15% APY).

Phase 3: Expansion (Q4 2025 – Q1 2026)

- **Q4 2025**: TON NFT integration (clan badges).
- **Q1 2026**: Mobile app (iOS/Android).

5. Security & Compliance

- **Audits**: Certik + TON Foundation.

- **KYC**: Optional for withdrawals >50K $KRC.
- **Team**: Fully anonymous, operations governed by DAO multisig (3/5).

6. Competitive Edge

Metric	KromoZone	Notcoin
Retention	65% (Projected)	12% (Actual)
Token Model	Deflationary	Inflationary
Access	Direct Mining	Telegram-only
